

# Banking Industry Security Solutions

*Cash Automation for Every Area of Banking*

**Banks today process more cash than ever before, and the trend shows no sign of changing.**

This is good for business; cash transactions bring in retail customers, and companies depend on their banks for secure cash management. However, cash processing also brings challenges. Cash is labor intensive, requiring careful focus on branch, treasury management, and cash vault processes. Banks must also meet demand for cash at any given time. Therefore, banks require consistent, reliable service and support.

## Demand for Retail Banking is Stronger than Ever

Mobile apps and personal computers have made retail banking easier and more convenient than ever, and yet many customers still prefer the personal touch of human teller transactions. Moreover, your branch tellers are ideally positioned to nurture relationships and recommend and sell the bank's products and services. The challenge is that branch tellers are compelled to focus their attention on handling and counting cash, thereby missing out on precious opportunities to engage with your customers.

Teller cash transactions are labor intensive, and they

distract tellers from valuable selling opportunities. Moreover, cash increases internal vault transactions, which are also labor intensive, and require that branches have adequate cash-on-hand to meet customer demand, which means increased security risks.

Socal Safe Company provides a comprehensive range of cash management equipment solutions for retail branch banks, including the workhorse AC-TCR Cash Recycler.

### **AC-TCR Teller Cash Recycler**

The AC-TCR Teller Cash Recycler is a state-of-the-art teller window cash management

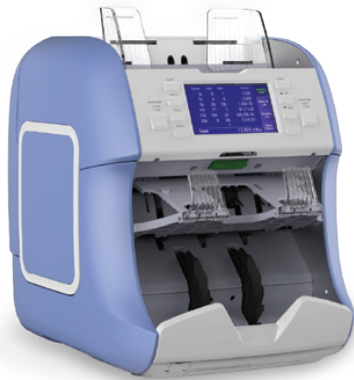

solution that helps maximize the performance of your most important asset: your people. Managing cash requires focused attention. Cash automation frees your branch tellers from labor-intensive cash handling and counting so they can engage with customers and focus on service and selling. It also addresses regulatory issues, allowing you to focus on business performance.

The AC-TCR Teller Cash Recycler is precision engineered to automate cash management and counting. Its speed and accuracy enables tellers to focus on customers from the beginning of the visit until the end, instead of being distracted by cash-handling tasks.

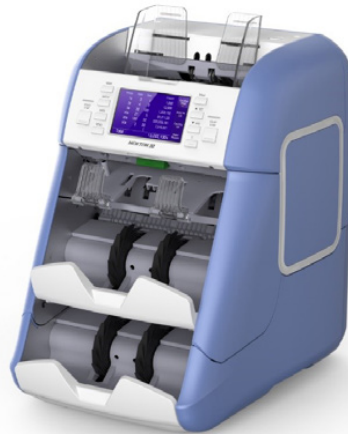

### **Cash counters**

Counting money is a teller's most important task. Banknote counting machines enhance this essential work by counting the exact amount and detecting counterfeits with far greater speed and efficiency than a human teller. Our cash sorters not only count currency, but count various denominations in multiple foreign currencies. All AccuCASH currency counters and sorters have best-in-class technology with dual CIS

**AC-3 CASH COUNTER** Its Dual CIS sensors are the latest technology and best-in-class. The AC-3 comes standard with 2 sorting pockets with a batch total up to 200 notes and one reject pocket with the capacity of up to 100 notes. It has the ability to store multiple denominations for easy switching between currencies.

**AC-30 2+1 POCKET CURRENCY DISCRIMINATOR** This versatile device is designed to take up less room but is still powerful with 2 sorting pockets with a batch total of 200 notes and a reject pocket with the capacity of 100 notes. The AC-30 has the best in class and the latest currency counter technology with Dual CIS sensors.

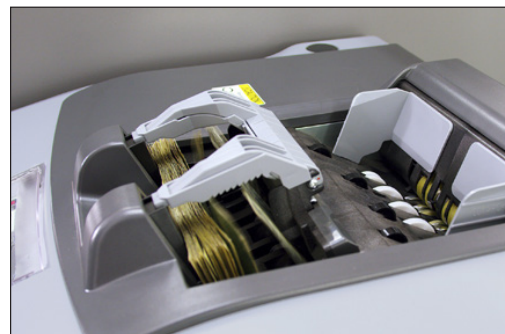

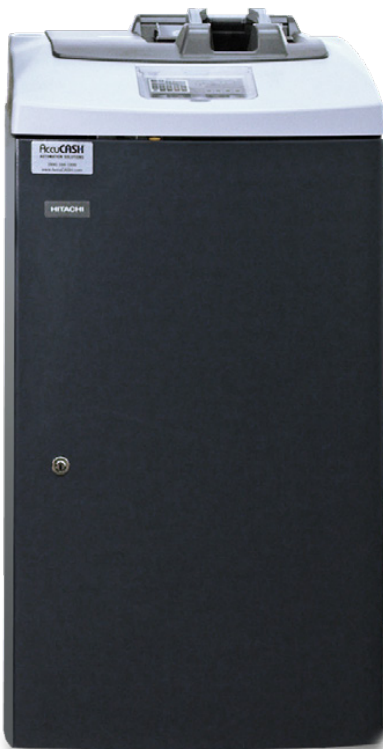

**AC-50 4+1 POCKET CASH SORTER** This heavy-duty high-speed sorter is small enough to fit on a counter or tabletop. The AC-50 comes standard with 4 sorting pockets with a batch total up to 200 notes and 1 reject pocket with the capacity of up to 100 notes. Its large 7in. detachable display has clear readouts with touch screen buttons for ease of use.

sensors. Each is capable of a batch total up to 200 notes with one reject pocket with the capacity of up to 100 notes.

Sorters are capable of serial number capture for rigorous tracking, counterfeit detection, and fitness sorting. They all

have convenient large-screen displays that let the user assign customer presets for special jobs.

**AC-TCR TELLER CASH RECYCLER** This teller window cash management solution offers productivity improvements exactly where it's needed in branch banking. Automating your cash handling frees your tellers from labor-intensive cash handling and counting so they can engage with customers from the beginning of the visit until the end. The AC-TCR features high speed note deposit for faster cash deposits

## Safe Deposit Boxes

Safe deposit boxes have been around for 150 years, and yet many retail banks rarely give them a second thought. Safe deposit boxes aren't exactly a money-maker, and they don't provide any obvious advantages for upselling unless the customer needs a bigger box. However, banks have always felt obligated to provide them.

Looking more closely, safe deposit boxes can have benefits beyond the small monthly revenues they generate. In the wake of the 2008 financial crash, banks have redefined their business model and accelerated the shift to online banking. This has resulted in dramatic reductions in bank branches worldwide, with an obvious consequence of having less availability of safe deposit box services.

Demand for safe deposit box services is as high as ever, and the middle-class makes up the bulk of deposit box demand. The majority of safe deposit box customers simply want a safe place to store family photos

and keepsakes and precious heirlooms.

## Setting the standard

Socal Safe is a proud distributor of industry-leading Bridgeman safe deposit boxes. Bridgeman's advanced design, rugged construction, feature rugged construction and maintenance-free finishes.

Bridgeman's modular case safe deposit boxes offer the advantages of low-cost construction, minimal upkeep, and high security. Die-cast doors are engineered with a continuous heavy flange, which interlocks with the door jamb, providing

even more robust security. All models are fitted with U.L. listed double key, changeable locks. Attractive finishes provide a maintenance-free safe deposit box vault.

## Vault Doors and Vaults

Truly the international standard for security and design, Bridgeman's Classic Vault Door combines robust security with sleek, contemporary styling. These industry-leading vault doors are fabricated from the highest quality materials, and they pass Underwriters Laboratories' most demanding tests, attaining UL listings for Class I, Class II, and Class III.

Our manufactured vault panels incorporate an ultra-high-strength concrete core, along with the formed steel pan. This

high-security construction results in an extremely rugged vault door that meets very close dimensional tolerances. These made-to-order doors can be manufactured and shipped quickly and installed easily.

## Streamline Finances with Treasury Management Services

Business owners demand banking resources that will help them manage their financial assets more efficiently and effectively, including treasury management services. These services help streamline businesses' finances by managing their cash, investments, and other financial assets. Treasury management can help optimize a firm's liquidity and minimize its financial and operational risks.

Treasury management and cash management refers to a specialized area of commercial banking that's designed to meet investment and risk-coverage needs of banks' commercial customers. There are many ways in which treasury management services benefit business customers, including automating accounts receivable and integrating data into their internal systems to enhance cash management and decision making.

Treasury management is also useful in preventing fraud, using various fraud-prevention products.

### **Maintaining cash flow**

Banks offering treasury management services have the ability to understand the unique needs of individual businesses, often working with their customers to identify which banking services can help them achieve their goals. Most banks serve a variety of types of organizations, including small businesses, non-profits, corporations, and government agencies. Banks offer products and services associated with business functions such as information reporting, collections, disbursements, and investments, with the goal of helping simplify business functions and maintain cash flow.

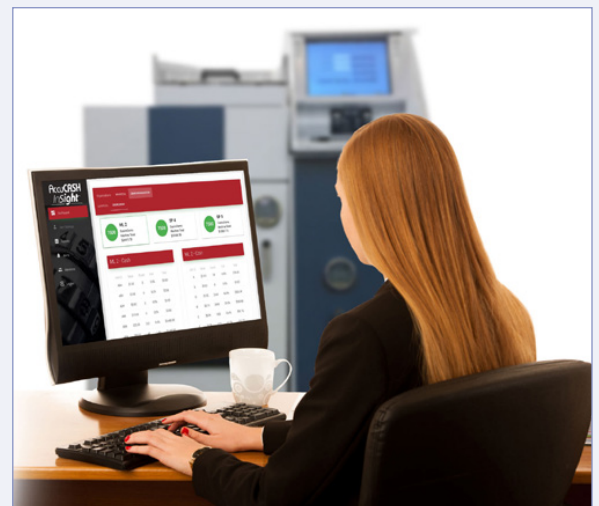

#### **AC-100 FRONT OFFICE SMART SAFE**

This is an intelligent cash deposit solution for small and large businesses. Cashiers remove high value currency from the cash drawer at prescribed times and secure them in the AC-100. It's high speed will process 300 notes per minute and up to 100 notes in its reject pocket.

#### **AC-1000 HIGH SPEED DEPOSIT SAFE**

Designed to optimize cash management in large businesses, this highly secure device safeguards cash against shrinkage and is well suited to handling large quantities of cash. Its advanced performance features 1000 notes per minute, 50 note reject capacity, and a 10 note counterfeit pocket.

#### **ACCUCASH INSIGHT BACK OFFICE SOFTWARE**

is designed to complement all of the best-in-class features of our AccuCASH Cash & Coin Recycling Systems. It provides users with the detailed information necessary for managing automated cash handling operations and for easily reconciling with existing POS Systems.

## Benefits of Treasury Management

Treasury management services deliver a variety of unique benefits to business customers. One of the primary benefits is greater time efficiency. An effective treasury management system enables businesses to streamline payments and minimize time spent initiating and authorizing payments. Treasury management also reduces costs, by giving businesses access to a variety of tools and resources that allow them to identify immediately the cost of

inter-bank transactions and take control of related fees. Achieving greater control over these processes enables more informed financial planning, thereby reducing the probability of costly errors.

One of primary functions of treasury management is determining the levels of cash or cash equivalents business customers need to maintain adequate cash to meet their financial obligations. A robust treasury management system is crucial to ensuring that your customers manage financial risk effectively.

Treasury management systems involve various procedures to help your business customers better manage cash flow, including receivables, payables, interest rates, and foreign exchange rates.

## Critically important to every business

Effective cash management is critically important to business organizations of all sizes. Even the best run business can fail if it has insufficient cash on hand for bills and other obligations. Treasury management enables companies to monitor cash inflow and outflow. It also extends the time companies need to retain money needed to pay bills and reduces the time it takes to collect money from customers.

Socal Safe provides comprehensive, reliable treasury management solutions, helping you reach small business customers such as convenience stores and quick service restaurants, and larger enterprises in a variety of industries.

**THE AC7500 CASH & COIN RECYCLER** Maximize a company's operational efficiency by eliminating the need for multiple employees to count and verify cash throughout the day. It accepts, dispenses, and validates cash and coins. It also dispenses starting tills and accepts end-of-day deposits. The AC7500's advanced software lets managers monitor cash inventory securely from any location, enabling visibility of cash and coin status in real time. Automated bank deposit preparation is possible by transferring funds into a deposit cassette.

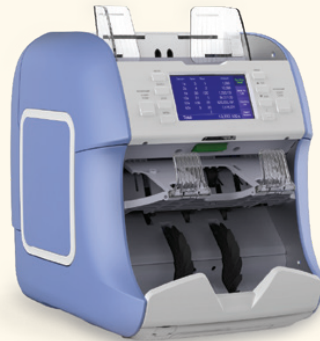

## Cash Vault Solutions to Respond to Your Customers' Needs

Cash vault services help banks process cash quickly, securely, and economically. Social Safe provides equipment and solutions for your cash vault services, allowing you to minimize risk, lower your fixed costs, and maximize efficiency. Our cash vault solutions protect your customers' deposits, utilizing online access to monitor funds. Your customers can get same-day credit for their deposits.

### Comprehensive Solutions

We can equip your infrastructure to enable you to handle processing requests of any size. Our comprehensive

**AC-60 MULTI-POCKET CURRENCY SORTER & STRAPPER** Operating from its crystal-clear 7 in. display, our most advanced device is noted for its expandability. The AC-60 can be expanded to a whopping 16 pockets with each additional module having 2 pockets with batch totals of 500 each. Its optional strapping module will strap 100 banknotes every six seconds.

**AC-3 CASH COUNTER** Its Dual CIS sensors are best-in-class. The AC-3 comes standard with 2 sorting pockets with a batch total up to 200 notes and one reject pocket with the capacity of up to 100 notes. It has the ability to store multiple denominations for easy switching between currencies.

cash vault solutions make use of advanced, high-speed technology to process cash, coins, and checks. Our specialized technology also ensures that bills are verified authentic, and conditioned before redistribution.

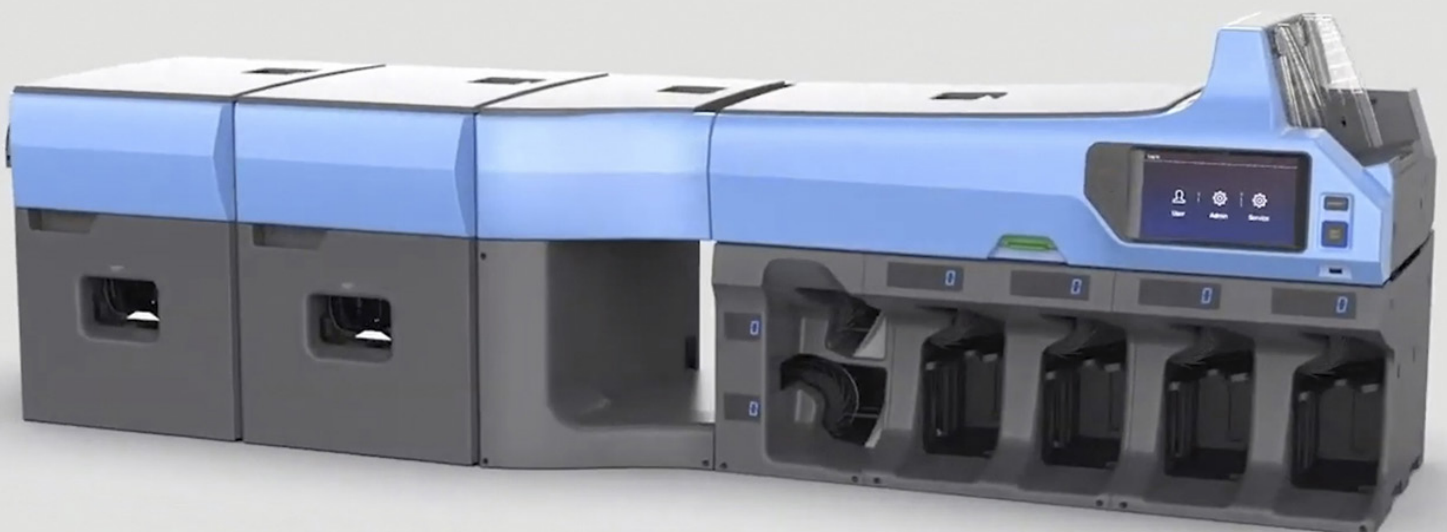

Our cash vault suite of products help safeguard deposits while simplifying your business.

Banks process billions in cash every day through their deposit operations. Our secure cash management solutions ensure efficiency, integrity, and transparency for your currency supply chain.

### Convenient access

Social Safe Cash Vault solutions offer protection and efficiency, enabling your customers to reduce employee risk, access funds quickly, and place orders easily. Transactions can be monitored and currency orders placed online 24/7, using our advanced software.

**AC-30 2+1 POCKET CURRENCY DISCRIMINATOR** (See pg 3) This versatile device has a small footprint but is still powerful with 2 sorting pockets with a batch total of 200 notes and a reject pocket with a capacity of 100 notes. The AC-30 has the best in class currency counter technology with Dual CIS sensors. Its large 4.3" display with touch screen buttons provides easy reading of count totals. Custom presets, serial number capture, facing of bills, and fitness sorting add to its robust capability.

## Socal Safe Sets the Standard for Total Customer Satisfaction

Socal Safe Company delivers outstanding service for wide-ranging products, from safes and safe deposit boxes to cash counters and recyclers and more.
